

# Recommended Minimum Computer Setup Checklist

## Please check your settings.

If not, you may experience these problems:

You can't move onto next lesson/topic/exam

The system "freezes" or doesn't proceed to next screen ...you are stuck

The following are minimum recommended settings and versions; other settings and versions may still successfully run the LMS and content.

## For Hardware:

### Modem / Internet

A 56K modem. Hi-speed internet connection for optimum performance.

### Monitor

14" or larger.

Screen resolution of 1024x768. Go to Start>Settings>Control Panel>Display>Settings Tab and view the screen area to adjust the screen size to your personal preference.

### Audio

Internal or external speakers. (Optional to turn off audio)

## For Software:

### Operating System

Windows 2000 I

Windows XP

### Browser

Internet Explorer 5.5 SP2

Internet Explorer 6.0

### Additional Software:

Flash 5.0 or higher – To download if needed go to [www.macromedia.com/software/flash/](http://www.macromedia.com/software/flash/).

Adobe Acrobat Reader 5.0 or higher – To download go to <http://www.adobe.com/products/acrobat/readstep2.html>.

JAVA Virtual Machine (JVM) – Both Microsoft JAVA Virtual Machine (JVM) and Sun JVM are compatible.

### Also recommended:

"Clear your cache" - Open your web browser, go to Tools, then Internet Options. Do the following on the General tab:

Temporary Internet files - Delete Files

History - Clear History

Disable Pop-up Blockers – See ["How to Disable Common Pop-up Blockers"](#)

## Recommended Browser Settings
